GLOBALGAP

AN INTRODUCTION TO THE REQUIREMENTS

Course Overview

GlobalGAP is an international farm-management system for Good Agricultural Practice (GAP). It has primarily been designed to reassure consumers that farm practices minimise the detrimental environmental impacts of farming operations, chemical use has been reduced and a responsible approach to worker health and safety (as well as animal welfare) has been adopted.

This three-hour course will provide delegates with a basic understanding of the GlobalGAP standard and their role in ensuring the system is successfully implemented.

The course can be customised by means of photographs which will identify good/bad practices and encourage staff to find solutions to the problems indicated.

Course Objectives

- To equip delegates with basic knowledge of the GlobalGAP standard requirements
- To equip delegates to understand their role in supporting and maintaining the GlobalGAP system.

Entry Level Requirements

Participants should have attended basic hygiene training.

To ensure that this course is valuable to your company, delegates must be comfortable communicating in English and need suitable reading and writing skills.

A certificate of attendance will be issued once the course has been successfully completed.

Who Should Attend

- Farm workers
- Packhouse employees
- Contractors who provide services to the farm.

Duration: Three hours

Language: English

Course Outline

- Background and history of GlobalGAP
- GlobalGAP standard requirements
- How to successfully implement the standard's requirements.
