ISO 22000 AN INTRODUCTION TO ISO 22000 FOR MANAGERS

Course Overview

The internationally-recognised ISO 22000 food-safety management system enables companies to plan, implement, operate, maintain and update their food-safety management system to ensure safe products.

The general misconception is that ISO 22000 is a combination of HACCP and ISO 9001. However, this is not the case as ISO 22000 is a standard (which emphasises food safety throughout the food chain) that contains certain ISO 9001 standard elements.

The course addresses management's responsibility in implementing and maintaining an ISO 22000 food-safety management system.

Course Objectives

To equip the participant with the knowledge and skills required to implement an ISO 22000 system.

At the conclusion of the course, participants will:

- Be familiar with ISO 22000 clauses pertaining to management involvement and responsibilities
- Manage the ISO 22000 system more effectively
- Understand implementation constraints.

Entry Level Requirements

To ensure that this course is valuable to your company, delegates must be comfortable communicating in English and need suitable reading and writing skills.

A certificate of attendance will be issued once the course has been successfully completed.

Who Should Attend

- CEO/GM/operational managers
- Group food safety co-ordinators
- Business owners.

Duration: Three hours

Language: English

Course Outline

- Background to the standard
- Comparing systems
- Overview of ISO 22000 clauses
- Discussing clause 5 (which includes management responsibilities and commitment, food safety policy and management planning, responsibilities and authorities, the food safety team leader, communication, emergency preparedness and management review)
- Allocation of resources
- Implementation constraints.
