TRACEABILITY

UNDERSTANDING THE REQUIREMENTS

Course Overview

Traceability is the ability to trace, follow and uniquely identify a product unit through a defined production operation or supply chain.

Traceability systems provide information on the history of a product and/or locate it within the supply chain. They help identify the cause of a nonconformity and aid product withdrawal and/or recall. They may also improve an organisation's effectiveness and productivity.

This training course will cover establishing, implementing and maintaining a traceability system.

Course Objectives

To equip delegates:

- with knowledge of traceability systems
- to implement and maintain a traceability system.

Entry Level Requirements

To ensure that this course is valuable to your company, delegates must be comfortable communicating in English and need suitable reading and writing skills.

A certificate of attendance will be issued once the course has been successfully completed.

Who Should Attend

- Staff responsible for setting up and managing traceability systems
- Employees involved in procuring raw materials
- Quality-assurance staff
- Those involved in technical and supply-chain management.

Duration: One day

Language: English

Course Outline

- Why traceability?
- Its fundamentals
- Organisation and planning
- Implementation
- Providing evidence of traceability
- Documentation and record keeping
- Practical application
