

Swift MICRO LABORATORIES

Training

Programme Co-ordinator: **Lulanie Swanepoel**

Swift is accredited with FoodBev SETA: Accreditation number: 587/00077/0610

VALIDATION AND VERIFICATION

- HACCP AND RELATED FOOD-SAFETY SYSTEMS

Course Overview

Validation and verification activities perform vital roles within HACCP and related food-safety systems. As there can be confusion when distinguishing the parts they play, this course provides a clear explanation and understanding.

Food-safety systems and pre-requisite programmes must be validated prior to implementation, obtaining evidence that safe products can be produced within a given process. After implementation, verification activities collect evidence that the systems are effective and compliant.

During this course we will examine the concepts of validation/verification and how they apply to food-safety systems. Reference will be made to current guidance documentation and standards.

Course Objectives

- To equip delegates with knowledge of validation and verification systems
- To school delegates to design, implement and maintain a validation and verification system.

Entry Level Requirements

To ensure that this course is valuable to your company, delegates must be comfortable communicating in English and need suitable reading and writing skills.

A certificate of attendance will be issued once the course has been successfully completed.

Who Should Attend

- Staff responsible for setting up and managing validation and verification systems
- Food-safety managers
- Technical and Quality managers
- Process/Product Development managers
- HACCP team leaders and team members
- Food-safety system auditors.

Duration: Two days

Language: English

Course Outline

- Why validation and verification?
- Overview of Codex approach to validation and verification
- Validation methods
- Verification techniques
- Microbiological criteria
- Sampling plans
- Validation and verification case studies
- Making validation and verification work.
